Communicate

We will communicate to members on environmental sustainable topics through events, videos and sharing initiatives of government, suppliers and competitors in a balanced manner, always respecting that there is no one way to start on each organisation's path to environmental health.

Collaborate

Working with our members, government, charities and suppliers, the committee will ensure an aligned approach for businesses, including supporting their employees on their individual journeys to an improved and sustainable environmental outlook in everyday activities.

Coordinate

Members will be supported on where to start, improve and deliver on environmental topics by way of information sharing, delivering presentations, providing supplier information and informing members of available certifications.

Commit

IoD Jersey will commit itself to consider the organisation's sustainable journey to being environmentally aware.

Celebrate

IoD Jersey through newsletters, member emails and supported media will "celebrate" members' success on their journey. The committee recognises members are diverse and are all at different stages in their environmental journeys.

Consult

We will create a consultation forum for members to participate and provide collective feedback to government and/or suppliers of the needs of each industry within the IoD network.

Communicate

We will communicate to members on environmental sustainable topics through events, videos and sharing initiatives of government, suppliers and competitors in a balanced manner, always respecting that there is no one way to start on each organisation's path to environmental health.
