NETWORK ACTIVITIES

Meet & share

The players in the ESI ecosystem are all facing very similar challenges when managing the complexity of their products and solutions. Exchanging experiences and sharing views and solutions are powerful means of enhancing success across the network. ESI facilitates a large number of activities for experts in industry and academia to meet & share

SPECIAL INTEREST GROUP

Special Interest Groups (SIGs) bring together experts and individuals with a keen interest in a specific topic or theme. ESI takes on the role of instigator and coordinator for these SIGs.

SIGs in 2024:
System & Software Testing | Systems Performance | Maintenance & Rejuvenation | MBSE | SASG

PROJECT CLUSTER

The objective of ESI Project Clusters is to identify and leverage synergies among projects addressing the same subject but involving different partners.

Project cluster in 2024:
Diagnostics

TOOL USER GROUP

Engage users of a specific ESI tool to ideally form communities of contributors. As a result, these user groups not only collect requests for enhancements but also actively contribute to their implementation.

Tool user group in 2024:
LSAT

STUDY PROJECTS

Beyond working in collaboration projects with industrial partners, we are committed to continuously updating and improving our available knowledge, driven by our long-term roadmaps. We achieve this by employing a study project instrument. In 2024, we have initiated 7 different studies. For more information, feel free to contact us.
