

Joint Innovation Center on Digital Lifecycle Management (JIC-DLM)

JIC-DLM is a collaboration between TNO, University of Twente and regional partners to accelerate the adoption of Digital Lifecycle Management.

What?

Address urgent societal challenges and strengthen competitiveness of the Twente region through the development and application of digital lifecycle management.

Why?

Efficiency and effectiveness of the full lifecycle of systems and assets are greatly improved by digital tools. This leap is needed to address societal challenges of today and tomorrow.

Who?

We are working together with local governments, municipalities, executive agencies and design and manufacturing companies who are seeking to improve their efficiency and effectiveness.

Three domains in one JIC

Housing

Platform-driven industrialization to solve the housing challenge

Digital Lifecycle Management

Secure data sharing

Sustainability-aware design

Platform-driven development

Hybrid knowledge- and data-driven approaches

Asset health assessment and prediction

Civil Infrastructure

Industrialize infrastructural design and management

High-tech

Improve high-tech system effectiveness
