Integrated Multi-Carrier Shipping

Welcome to the new-age of shipping

Integrated Cloud Multi-Carrier
Shipping Solution Provider

- Built-in integrations with parcel and LTL carriers (FedEx, UPS, DHL, FedEx Freight, Old Dominion, SAIA, CH Robinson, etc.)

- Integration with your ERP/WMS/TMS/eCommerce system

- Shippers of any size

- Automation of all shipping processes that are gaps in your existing ERP/WMS/TMS system

- SaaS solution with Web UI (or) blackbox integration through APIs

50+ Customers . US | India | Canada . 100+ Carriers

Pre-shipping Modules

## Streamlining pre-shipping processes to enable smooth shipping & compliance

Address Validation

- ✓ Normalize address
- ✓ Catch any address errors
- ✓ Identify residential addresses
- ✓ Never miss specifics like suite #, apt #, etc.
- ✓ Eliminate late deliveries
- ✓ Avoid costly penalties
- ✓ World class customer service

Restricted Party Screening

- ✓ Real-time check with the denied party list(s) of your choice
- ✓ If any address changes during order entry or shipment execution, automatic re-checking
- ✓ Ability to easily add custom rules to create shipments blocks (overdue payments, sudden government restrictions, etc.)

AESDirect/ACE Filing

- ✓ Pre-file with AESDirect/ACE and get an ITN number within seconds
- ✓ Avoid manual entry and errors
- ✓ System auto-determines carrier SCAC and port of export
- ✓ System auto-files if actual carrier SCAC, port of export, and date of export differ from original
- ✓ Save time, be compliant, and avoid costly penalties

Rates & Ship Method Selection

Always choose the most optimal ship method for each shipment

Rate Shopping

✓ View all available carrier/service level options for that order/shipment
✓ View published and discounted rates
✓ Estimated delivery date
✓ Empower your customer by giving them a choice during order creation

Business Rules Engine

✓ If customer preference is not selected, your business rules will drive the automatic selection of cheapest ship method that meet the delivery due date
✓ Easily maintain rules, priorities based on any shipment factor like weight, geography, day of the week, etc.

Spot Quote

✓ Ability to reach out any number of carriers for a spot quote
✓ Easy quoting process via an email link
✓ Greater control by specifying pick-up date/time(s), delivery date/time, maximum bid, auto-selection, auto-expiry, etc.
✓ Email notifications
✓ Integration back to the shipment execution and auditing

Shipping Modules/Features

Seamless, optimized, and automated shipment execution, visibility, and auditing

Shipment Execution

- ✓ Packing with weighing scale integration
- ✓ Integration with all carriers to transmit shipment data digitally
- ✓ Print carrier compliant label, BOL, Commercial Invoice, etc.
- ✓ Integrated dangerous good ☢ compliance and documentation
- ✓ Capture published/discounted freight cost & tracking number
- ✓ Update tracking number and freight cost back to ERP

Visibility with POD

- ✓ End-to-end shipment tracking
- ✓ Email notifications SMS
- ✓ Milestones with location and local date/time
- ✓ POD Name, date/time, location
- ✓ Signature Proof of-Delivery
- ✓ On-time delivery report
- ✓ Exceptions (Delayed/Damaged shipments) report
- ✓ Alerts/notifications

Invoice Auditing

- ✓ Electronically receive invoice data
- ✓ Maintain tolerances
- ✓ Reporting on accruals
- ✓ Catch common errors/discrepancies like:
  - ✓ Weight & Charge discrepancies
  - ✓ Duplicates
  - ✓ Orphans
  - ✓ Missing PODs
- ✓ Auto-approval + manual review process for approval and rejection
