

Solver CPM

Faster, Better Decisions Drive Performance

Solver Corporate Performance Management Solution

Enable faster and better business decisions

Financial managers and executives in growth-focused organisations are looking to maximise decision-making capabilities for success in the ever-growing, competitive marketplace.

Solver provides a single, cloud-based solution that automates reporting, consolidations, budgeting and forecasting processes, and supports faster and better decisions based on key information from across the organisation's data sources.

Solver empowers users with 360 business insights that drives intelligent decisions and competitive advantages. Solver's cloud-software suite provides 4 essential modules for financial managers:

REPORTING:

Solver's cloud suite offers modern, dynamic reporting with out-of-the-box integrations to many of the world's most popular on-premise and cloud-based enterprise resource planning (ERP) systems.

PLANNING:

A combination of automated budgeting and forecasting capabilities gives business leaders a comprehensive planning tool for future investments, cost control, reporting and analysis.

DASHBOARDS:

With Solver's cloud-based web portal, your reporting and budgeting users as well as executives can also get access to dashboards. Dashboards help unify your most important assets – your people and your data.

DATA WAREHOUSE:

The Solver Data Warehouse is a next-generation, pre-configured data warehouse based on the world-leading Microsoft SQL Azure platform. Now all of your key data, whether in-house or cloud-based, can be stored and available for consolidated reporting, analysis, and dashboards.

Why Choose Storm Technology?

Make the Solver deployment process seamless with assistance from Storm Technology experts who will work with you to transfer knowledge and help your organisation grow and gain complete insight into your business.

Leveraging over 25 years experience delivering innovative technology solutions across a wide range of industry sectors, Storm helps organisations like yours maximise return on technology investment. We work with you to build a roadmap for digital success, providing advisory consulting and technical expertise, all backed by a proven best practice methodology.

Solution Capabilities

Complete insight across your Organisation

Ranked by users as one of the top cloud CPM solutions in the world, Solver is built for the rapidly evolving demands of companies aspiring to thrive in today's marketplace.

Organisations use this solution to automate and streamline financial and operational reports, consolidations, and budgeting and forecasting processes. Solver CPM combines financial and other key data into a single tool, powered by the most flexible report and planning form designer on the market.

Solver's modules can be used individually or together as a complete corporate performance management (CPM) suite based on your company's unique requirements and priorities.

Automate and Streamline Your Reporting & Consolidation:

The easy-to-use and flexible report writer offers cloud-connected Excel report design with a modern browser-based web portal that provides finance professionals and end-users with powerful financial and operational reporting capabilities in a variety of layouts and presentation formats.

Budget, Forecast and Model with Diverse Data Types:

A modern budgeting solution not only provides process automation, time savings and more accuracy, but it also helps manage your financial expectations for future periods. The latest forecasting technology allows you to estimate your financial outcomes based on past data on a weekly, monthly or annual basis. These aspects of financial planning provide critical insights and competitive advantages for your company.

Access and Visualise Company Data for Quick Insights:

These powerful, web-based dashboards help you visualize trends, identify issues, and ultimately drive success, whether you deploy on-premises or in the Cloud. Solver's Power BI connector and templates enables professional, near real-time dashboards for any data you load to the Solver Data Warehouse.

Leverage Consolidated Company Data for World Class Decisions:

Leverage diverse data types with a single, high performance data warehouse platform that you can configure for company-specific analytics. In this multi-cloud and multi-system enterprise technology era, a modern, pre-built data warehouse allows you and your team to hit the ground running with a solution that consolidates your company information.

Solver Data Source Connector: Microsoft Dynamics Business Central

Integration Platform

Solver offers a robust platform to streamline the movement of data both into Solver as well as out of Solver to your other applications.

Loading Data

Solver's cloud platform includes an integration interface with scheduling of automated data loads and a number of generic as well as specific data source connectors.

Exporting Data

Export completed budgets back to the ERP system or leverage BI tools like Microsoft Power BI by connecting these to Solver to export data to their dashboards.

Excel Export

Solver can deliver data to Excel files in virtually any format that matches the required import format of third-party solutions with auto-scheduling via Solver's Publisher.

Solver API

Using this secure API as well as a connector, data can be delivered to a third-party solution.
