

# Power Platform Advisory Services

*Expanding Possibilities with  
Power Platform*

# Innovate with Power Platform

## What's holding you back?

A gateway to innovation, low-code solution Power Platform empowers business users to create bespoke apps, workflows and virtual agents with little to no IT intervention, speeding up time to market and fostering a culture of innovation. Enabling business users to aggregate, analyse and action data quickly and easily.

However, to truly tap into the solution potential, special expertise and adaptive governance is required to ensure security, adoption and meaningful solution design, but how can you upskill your team to be efficient and leverage best practices when building on Power Platform?

Storm's Power Advisory Services bring business and technology together, helping organisations like yours expand the possibilities of what Power Platform can achieve. Driving sustainable impact and ensuring your team has access to the skills and expertise required to create with confidence.

### Microsoft Power Platform

One low-code platform that spans Office 365, Dynamics 365, Azure and standalone applications

## Why Choose Storm Technology?

As a leading Microsoft Gold Solutions partner, Storm Technology has over 25 years experience expanding the possibilities of what digital technology can achieve for our clients. Providing the technology and business skills required to harness the latest technology trends, while keeping a firm eye on your unique business needs and objectives.

Supported by a team of over one hundred dynamic, highly experienced and certified professionals across the Microsoft ecosystem, our Power Platform team has successfully delivered low-code solutions across a wide range of organisations and industries. With our Power Platform portfolio including;

- Return to work management apps
- Meetings management apps
- Risk tracking apps for in field use
- Apps for simplified expenses management
- Employee onboarding apps
- Health & Safety checklist apps
- Stadium management portals & apps
- System integration for approvals

## Power Platform Services

### Helping your team realise the full potential of Power Platform

From design to development, Storm's Power Platform Advisory team provides your team with access to the knowledge required to succeed, whether they need low-code solution training, advice and guidance when creating the very first app or help to scaling with advanced governance and control.

### Power Platform Advisory

A retainer-based service model Power Platform advisory provides your organisation with a flexible approach to power platform consultancy services. Simply create a Power Platform Advisory request via phone, email or the online portal and your request will be carefully matched with a consultant based on the request category.

The categories are;

- **Advisory 1:** General app maker query (Model, Canvas, Power Automate and Power BI)
- **Advisory 2:** General solution design query
- **Advisory 3:** Solution architecture and design query
- **Advisory 4:** Environment, Governance or ALM workshop

Additionally, should your organisation be ready to scale up Power Platform adoption, our team can support you with fostering a culture of low-code innovation and the creation of an internal Centre of Excellence for Power Platform

### Power Platform Training & Consultancy Days

Central to the success of any Power Platform adoption plan lies employee training, ensuring both your technical and non-technical team have the resources and skills required to build, manage and support low-code applications and workflows with confidence.

Our Power Platform Training and Consultancy team create a bespoke training programme for your team of makers, designers and users, with the level of technical detail tailored to meet the needs of individual user groups or via "train the trainer style" sessions to provide your business with the skills necessary to conduct in-house training session as the team grows.

As your team continues to build their knowledge, consultancy days can be used to kick start or accelerate your Power Platform journey.

#### Power Platform Consulting Skills

- |  |                                  |
