

Wash'Em Champion Training & Support

Are you planning to train others in how to use Wash'Em? Do you have lingering questions about how Wash'Em was created, and how it's been used? You're invited to take part in a series of upcoming events, and get support to run your own Wash'Em training.

Wash'Em Champion Webinar Series

The Wash'Em Champions webinar series begins in the last week of March. Join Sian White, the lead researcher behind Wash'Em, to learn more about how Wash'Em was created, and how it has been implemented.

All webinars will be recorded, and delivered in English with simultaneous translation in French and Spanish.

Wash'Em: The thinking behind the process

Tuesday, March 29 2 p.m. BST (UTC + 1)

Learn how Wash'Em utilizes behaviour change theory and research in its design, and discover the characteristics of Wash'Em that make it unique. [Register now.](#)

'Under the hood' of the Wash'Em program designer

Tuesday, April 26 2 p.m. BST (UTC + 1)

Our speaker will explain the logic behind the software, including how the algorithms were designed to provide recommended activities based on the data you enter. You'll learn about the types of activities recommended and how they were developed. [Register now.](#)

Best practices for the integration and implementation of Wash'Em recommendations

Tuesday, May 24 2 p.m. BST (UTC + 1)

Learn best practices in how to integrate Wash'Em recommendations into new or existing water, sanitation and hygiene (WASH) or humanitarian programs. [Register now.](#)

Wash'Em implementation experiences

Tuesday, June 28 2 p.m. BST (UTC + 1)

Learn first hand from other users about how they implemented Wash'Em in different contexts and the results they achieved. [Register now.](#)

Wash'Em Training Materials

Are you delivering face-to-face or online blended Wash'Em training? We have newly updated training packages ready for you to use in English, Spanish and French. [Contact us](#) for access to the materials described below and for support in using them with your target audience..

- ✔ Self-directed study is ideal for individuals who want a deeper understanding of Wash'Em, but have limited schedules or prefer to learn in their own time. The training program takes approximately 10 hours to complete.

Self-directed training is available in English, Spanish and French. It can be done through the Wash'Em platform, or by uploading the course on your organizations' internal learning management system. [Contact us](#) to sign up for the training, or learn how to host it on your organization's platform.

- ✔ Blended training is ideal for professionals who want the opportunity to practice using the Wash'Em tools with peers around the world. It can be a great way of training people in multiple countries at once.

Training involves approximately 10 hours of independent work and 14 hours of scheduled live online practice, typically over two to three weeks. Participants are strongly encouraged to complete the required independent study components before the live sessions.

Materials are available in English, Spanish, and French for running a blended online training. Participants complete the self-directed course first and supplement it with live virtual or classroom sessions to practice the use of the rapid assessment tools. We can support you to run a self-directed training for your organization, and provide you with all the materials you need for the virtual sessions. Online sessions are facilitated using the materials provided in the face-to-face training packages.

- ✔ Face-to-face training is ideal for WASH managers and frontline staff. It provides the opportunity to directly interact with instructors and peers and get hands-on practice using the Wash'Em tools. Training is generally delivered in three days.

We have two face-to-face training packages available in English, Spanish and French. The complete face-to-face training package comes with all the lesson plans, slides, and handouts that you need to run a training for a large cohort of participants. The staff orientation handbook, available in [English](#), [French](#), and [Spanish](#) is designed to help you run a leaner version of this training, with a small group of staff, when you have limited time available for training and plan to use the Wash'Em process as part of immediate program work.

Wash'Em Community

Do you have more questions? Are you interested in learning about how others are using Wash'Em? Join our growing community of Wash'Em Champions in [English](#), [Spanish](#) and [French](#) forums to ask questions and share your knowledge.

Webinar Question: Have a question for our speaker? Let us know [here](#) and we'll do our best to address them during the webinar.
