to plant even more trees **together**

Turning Tips into Trees

More Benefits for the Environment and for YOU!

Invest in Fastrak®, FastZAP™ and ZAP™ and you'll be using great quality pipette tips, and make a sustainable contribution to the environment with the LaboraTree campaign.

Save just 15 LaboraTree tokens from your Fastrak®, FastZAP™ and ZAP™ tip boxes to plant a tree in woods across the UK.

What is LaboraTree?

LaboraTree is Alpha Laboratories’ scheme to plant trees and make a sustainable contribution to the environment.

It’s free to join and exclusive to Fastrak®, FastZAP™ and ZAP™ tip users, giving you a unique combination of green benefits.

Why plant trees?

- Trees absorb harmful carbon dioxide from the atmosphere, reducing the effects of global warming
- Woods provide habitats for many endangered wildlife species, conserving biodiversity
- Woods are a place for leisure and relaxation for us and future generations to enjoy

Where do we plant trees?

Thanks to the dedicated LaboraTree members over 2,800 trees have been planted across the country and are helping make a difference to our environment.

Through tree planting partners like The Woodland Trust and EFORESTS, the trees are planted in UK based community woodlands, nature reserves and community farms, to ensure they are maintained properly so they live to maturity.

You’ll receive a certificate for each tree detailing the species and location of planting.

Three Simple Steps:

Step 1:

Register online at www.alphalabs.co.uk/laboratree and we will send you a LaboraTree collector’s card with your unique membership number.

Step 2:

Apply the special tree tokens found on the outside of Fastrak, FastZAP or ZAP tip packs to your collector’s card. You can use any combination of the two tokens to complete your total of 15 per card.

Step 3:

When the card is full, return it Freepost to us. We will plant your tree and record any ZAP tokens towards your additional gift. You will also receive your personalised e-certificate.

LaboraTree Online

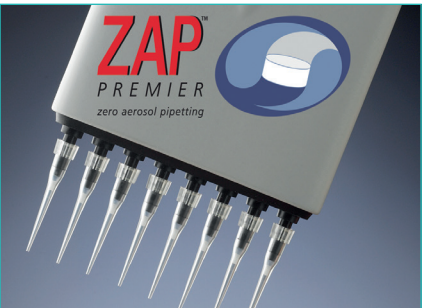

Visit www.alphalabs.co.uk/laboratree to read the latest news, find out about our tree planting partners, see where the woods are located and catch up on our tree planting progress.

Fastrak®, FastZAP™ and ZAP™ - Growing Greener Together

The LaboraTree scheme awards tokens for each ZAP Premier filter tips and Fastrak tip refill purchased. In 2022, Alpha Laboratories halved the number of tokens needed to plant a tree, meaning you only need 15 tokens rather than the previous 30, making even easier to take part.

Using both Fastrak, , FastZAP and ZAP together is the perfect eco-friendly combination. Over 30% of the energy needed to make ZAP tips comes directly from solar panels. You reduce the amount of waste in your laboratory too.

The Same Excellent Tip Quality

ZAP Premier Filter tips, Fastrak and FastZAP refill tips are made with non-cytotoxic, medical grade, 100% virgin polypropylene. Each batch is certified for extractables (RNase, DNase and human DNA) to ensure no interference in PCR or DNA work.

The sterile ZAP tips are also tested for endotoxin contamination. Metals testing is performed on the resin substrate on a batch by batch basis.

The Additional Benefits of Collecting ZAP Tokens

We will record the cumulative number of ZAP tokens you collect on all your tree planting certificates. For every 100 ZAP stickers collected, you can choose a special additional gift for your organisation. Just select your preference on your Collector’s Card.

Here are some of the great ZAP prizes you could get for your organisation:

- Water Fountain
- Bird Bath
- Bird Feeder
- Bench
- Picnic Table

Combine ZAP™ Filter Tips & Fastrak® Tip Refills

Match up the colours to select your combination of compatible tips and racks.
