Transforming the Future of Blood Collection

Clinical Grade Sampling Made Simple

Tasso+ is a patient centric capillary blood collection device designed to make sampling easier, more comfortable, and more accessible. With just the push of a button, users can collect clinical grade capillary blood directly into a BD Microtainer® without the complexity of traditional methods.

A Better Alternative to Traditional Lancets

- ✓ Enables patients to collect reliable samples **at-home** or in **point-of-care** settings
- ✓ Removes the need for a phlebotomist
- ✓ Designed for ease of use, comfort, and confidence
- ✓ User-friendly design supporting those with needle phobia and diverse needs, improving accessibility

Comfort, Convenience, and Confidence in Every Draw

Whether used by a healthcare professional, carer, or as part of a home test kit, this wearable lancet provides a virtually pain free, and stress free sampling experience.

Why Tasso+?

- › Virtually pain free blood collection
- › Simple, one button operation
- › Suitable for a wide range of users
- › High quality, clinical grade samples
- › Wearable, discreet, and easy to apply

Tasso+ brings modern convenience to blood collection – making the process **smoother, safer,** and **more accessible for all.** For more information please scan or visit:
