STRECK

Retic-Chex® Linearity

Retic-Chex Linearity is designed to establish the reportable range and linearity of select haematology analysers that report the reticulocyte parameter. The linearity control kit is assayed for Sysmex and Beckman Coulter haematology analysers.

Features

+ Plastic vials with pierceable caps for analyser autosampling
+ Assayed for Sysmex and Beckman Coulter haematology analysers
+ 5-day open-vial stability
+ 105-day closed-vial stability

Benefits

+ Helps clinical laboratories meet quality requirements
+ Established assay ranges provide less room for error
+ Access to *STATS*®, a free interlaboratory quality control program with peer group data comparison and online submission

Ordering information

Description	Catalog#
5 x 2.5 mL for Sysmex	285532
5 x 3.0 mL for Beckman Coulter	285535
