

**AQUA COASTAL 12 YR WINTER COVER
12 YEAR LIMITED WARRANTY
TWO YEARS FULL**

AQUA COASTAL warrants to the original purchaser of the Winter Cover that the company, at its option, **WILL REPAIR FREE OF CHARGE OR REPLACE** any cover where the fabric deteriorates or an open seam becomes apparent within TWO (2) years of purchase. After the initial two-year period, upon prepaid return of the cover by the owner, AQUA COASTAL will, at its option, either repair the cover at a nominal charge or replace it with a new cover as per the prorated provisions shown below. All repaired or replaced covers will be returned at the homeowner's expense. The prorated basis for cover replacement is as follows:

In the first 2 years: no charge to the homeowner for fabric deterioration or seam separation
 Replacement Charge – 3rd year 60% of then current dealer suggested list price
 Replacement Charge – 4th year 70% of then current dealer suggested list price
 Replacement Charge – 5th year 80% of then current dealer suggested list price
 Replacement Charge – 6-12th year 90% of then current dealer suggested list price

WARNING - AVOID RISK OF DROWNING

- KEEP CHILDREN AWAY. CHILDREN, ANIMALS OR OBJECTS CANNOT BE SEEN UNDER THE COVER.
- CHILDREN CAN DROWN ON TOP OF COVER
- REMOVE COVER(S) COMPLETELY BEFORE ENTRY OF BATHERS - ENTRAPMENT POSSIBLE.
- NON-SECURED OR IMPROPERLY SECURED COVERS ARE A HAZARD.
- FAILURE TO FOLLOW ALL INSTRUCTIONS MAY RESULT IN INJURY OR DROWNING.
- **THIS IS NOT A SAFETY COVER!**

Excessive abrasion and grommets pulling out are specifically excluded from this warranty. In use, the two-sided coating will wear and create a pin holing effect, This is normal and NOT a cause for concern as the cover will continue to keep your pool clean and free from dirt and debris. Although any warranties implied are limited to the stated period after the date sold to the original purchaser, some states and/or provinces do not allow limitations on the length of time of an implied warranty. Therefore, the above may not apply in such states/provinces. Any claimant under this warranty has specific legal rights and the provisions in the warranty are neither a modification nor subtractions, but rather, an addition to the statutory warranties and other rights and remedies contained in the applicable slate or provincial legislation. Manufacturer will not be liable for any incidental or consequential damages resulting from any defects in workmanship or material. Some states and or provinces do not allow the exclusion or limitation of incidental or consequential damages, therefore the foregoing limitation or exclusion may not apply. This warranty gives the original consumer purchaser specific legal rights. The purchaser also has implied warranty rights. In the event of a problem with warranty service or performance, you may be able to go to a small claims court, a state court or a federal district court.

TO FILE A CLAIM

1. Please call (416) 665-6400 between the hours of 10:00am and 4:00pm eastern standard time Monday – Friday.
2. You will receive a warranty questionnaire in the mail. Once authorized the questionnaire will need to be filled out and returned to Aqua Coastal along with proof of purchase and a 1' x 1' section of defective cover. Showing clearly the nature of problem
3. Please allow 6–8 weeks for warranty claims to be settled.
4. Aqua Coastal Corporation will not be responsible for lost mail.

WARRANTY CLAIM RETURN CARD

I have read all the provisions of the warranty and instruction sheet and am fully aware that the winter pool cover hereby being registered is not a safety cover.

AQUA COASTAL 12 YEAR SOLID WINTER POOL COVERS

OWNER'S INSTRUCTIONS / SOLID WINTER COVER

COVER PERFORMANCE

The winter cover material is required to withstand the environmental extremes of cold and heat. The finished product has to withstand harsh Canadian winters as well as intense sun conditions. The winter cover is light-weight for ease of handling, yet has the strength and durability to merit an extended warranty. Years of trouble-free use in the marketplace has confirmed the success of this product.

The solid winter cover is designed to:

1. Keep the dirt and debris out of your pool during the non-swimming months when your pool is closed. When combined with a proper winterizing program, the cover is especially effective in maintaining clean pool water.
2. Protect your investment by sheltering your pool from the wear and tear of winter weather.

In performing its job, your winter cover will be subjected to considerable abuse, it will become dull, grimy and some calcified matter may form on the cover. This appearance does not mean that your cover is of inferior material or construction. To the contrary, it indicates that the cover is doing its job of saving your pool from the destructive forces of nature.

WINTER COVER INSTALLATION – IN GROUND

- The cover rests upon and is supported by pool water. Therefore, prior to cover installation, it is important to make sure the pool is not leaking.
- Follow the manufacturers/builders winterizing instructions for your pool and accessories.
- Consult with your pool dealer on the appropriate winterizing chemicals to be used. The pool must be chlorinated until freeze-up to prevent algae growth.
- Although your Winter Cover is made of a tough material, it required that you pad sharp corners, abrasive decking, protrusions, rough edges at the coping, etc. with old towels, foam remnants or corrugated cardboard, etc.
- Lower the water level in your pool below the skimmer (approximately 18 inches down from the coping) to prevent freezing.
- Lay out the cover on the ground, black side down. Then spread it across the pool.
- For covers with straps, insert the unified vinyl water tubes through the straps around the complete perimeter of the pool, it is important to lay the water tubes end to end to prevent the wind from getting under the cover. A billowing wind condition can cause serious damage to your cover. If the tubes are to be subjected to freezing temperatures, they should be half-filled, allowing for ice expansion, to prevent damage.

WINTER COVER INSTALLATION – ABOVE GROUND

- The cover rests upon and is supported by pool water. Therefore, prior to cover installation, it is important to make sure the pool is not leaking.
- Follow the manufacturers/builders winterizing instructions for your pool and accessories.
- Consult with your pool dealer on the appropriate winterizing chemicals to be used. The pool must be chlorinated until freeze-up to prevent algae growth.
- Although your Winter Cover is made of a tough material, it required that you pad sharp corners, abrasive decking, protrusions, rough edges at the coping, etc. with old towels, foam remnants or corrugated cardboard, etc. also, place padding underneath the winch (nondeck pools only).
- Lower the water level in your pool below the skimmer and return lines (approximately 18 inches down from the coping) to prevent freezing.
- Insert one end of the cable through the hole of the end of the winch and spindle. Insert the other end of the cable through the hole on the opposite side of the winch and into the same spindle. Pull both ends at the cable through as far as possible. Start turning winch to lighten the cover. If material bunches or gathers, simply walk around the pool and position it neatly.
- When the cover is installed on the pool it is normal for a small amount of water to seep onto the surface of the cover.
- For deck pools, place the cover over the pool with the black side down. Either weave the cable through the grommets and between the pool deck stanchions (posts) or run short pieces of cable from the grommets to the individual stanchions.
- It is important to tie down the cover properly to assure that the cover is not subjected to wind damage.

WINTER COVER CARE AND MAINTENANCE

Proper care in handling, storing and maintaining your cover will prolong its useful life.

1. **DO NOT** use abrasive materials such as concrete blocks, bricks or boards to hold the cover down.
2. **DO NOT** remove leaves or other debris from the cover with a sharp object such as a rake.
3. **DO NOT** install a cover without padding sharp corners, decking protrusions, rough edges of the coping, etc.
4. **DO NOT** store your cover without cleaning it with water (mild detergent if necessary) and soft brush prior to drying thoroughly to prevent mildew if excess humidity and moisture is a storage concern, the cover can be dusted with a talcum powder.
5. **DO NOT** allow water to accumulate on top of your cover.
6. **DO NOT** remove your cover from the pool without first pumping all the water off the cover.

All warranty claims should be handled directly with AQUA COASTAL Customer Service Department between the hours of 10:00 A.M. – 4:00 P.M. Eastern Standard Time Monday through Friday.

**Do not take your cover back to the store – all warranty claims will require original proof of purchase –
Please make sure to retain your original bill of sale.**
