FeherGuard Reels Contain These Quality Features

Extruded Aluminum Tubes

Heavy duty extruded aluminum tubes provide industry leading strength, durability and corrosion resistance.

Rib-Lock Tube System

Adjustable length 'twist and lock' designed tubes are structurally stronger than conventional tubes.

Quality Tube Finishes

'Silver Guard' Anodized Finish reduces tarnishing and provides an appealing silver luster that will last for years. Mill finish tubes offer cost savings without compromising strength. (Mill tubes may tarnish over time.)

High Density Polyethylene

Lightweight, stronger than the same weight in steel, with UV inhibitors that protect against sun damage.

2 Handle Convenience

Two handles allow the Solar Blanket to be rolled up easily from either side of the pool.

Wide Track Bearings

Specially designed "Wide Track" Nylon Bearings allow for easy turning.

Locking Casters

Easy rolling, locking casters allow simple roll away storage, while providing a firm braking system for blanket roll-up.
